CV

MÁRLON MEDEIROS BRUM

Software Engineer

MY PROFESSIONAL PROFILE

I have been working in software development for 27 years, with experience in various platforms and tools such as .NET, PHP, and more recently Python and artificial intelligence tools, as well as SQL Server and MySQL databases. I also work with systems analysis and gathering requirements directly with clients. I have also coordinated a team of developers, acting as a bridge between them and the business analysts..

Academic Background

Postgraduate

PECE – Escola Politécnica USP
MBA in Software Technology
Duration: 2 years – Finished in 2006

Higher education

Faculdades Associadas de São Paulo
Bachelor's Degree in Computer Science
Duration: 4 years – Finished in 2003

High School

Escola Técnica Federal de São Paulo
Technical Degree in Data Processing
Duration: 4 years – Finished in 1999

PROFESSIONAL EXPERIENCE

Freelance Developer

From May/2018 to Present

I currently work as a freelance professional, with several clients, including the São Paulo Institute of Engineering. I develop software solutions and provide consulting services using various technologies.

BASE Optimization Consulting e K12 Educação

From August 2011 to May 2018

I worked at the company BASE, which later merged with K12 Educação, where I became a partner. I developed a scheduling system for schools on the .NET platform, using an advanced optimization algorithm to find the best timetable. I also managed the system's operation and maintenance, overseeing the application on Azure.

PRODESP – Processamento de dados do estado de São Paulo

From October 2005 to July 2011

I worked at PRODESP (outsourced by the company B2Br), on the process control system for the courts of justice of the state of São Paulo. I served both as a developer and as a coordinator of a development team, acting as an intermediary with the business analysts.
